

I'm a full stack developer who's passionate about helping others bring their digital visions to life. My interest in development started when I was younger but didn't reignite until post college. My passion stems from being able to help people connect on a global level by providing tools that make day to day tasks more efficient. I'm excellent at meeting deadlines, love collaborating with a team, as well as building detailed projects.

Proficiencies: HTML, CSS, SASS, Javascript, JQuery, Postgres, Python, VueJS, Flask, FlaskSQL, MySQL, MongoDB, NodeJS, ReactJS, NextJS, Typescript, Wordpress, Git, Github, Agile/Scrum, Heroku, Netlify, and Vercel.

Projects:

Groove Station: Successfully implemented OAuth into an application that allows users to search and query the Spotify database. From there they can add or delete songs from their playlists. Technology used: Javascript, HTML5, CSS3

Try this instead....: An application built for users that want to query for substitute ingredients using the BonAPI. Technology used: Vue.js, HTML5, CSS3, Node.js

Work Experience:

General Assembly, Software Engineering Immersive Remote, *Student* May 2020-August 2020

- Spent three months learning the latest technologies and how to build, deploy, and debug applications.
- Collaborated with other developers and UX/UI designers to create applications using cutting edge technology like Vue.js, Next.js, Flask, and React.js.

Robert Half Technology, IT Recruiting Manager September 2019-April 2020

- Within the first 8 months, booked over 80K in revenue by recruiting top talent in the market and relating to their career goals.
- Managed a candidate base of over 400+ people, while maintaining 10-12 interviews and 2-3 client visits a week, which taught me the importance of software that properly functions.

MINDBODY, *Beauty and Wellness Specialist* March 2019- September 2019

- Educate and integrate two differing business management software tools into the wellness industry through cold calling and prospecting.
- By leveraging the importance of Minbody and Booker's software and their features, it allowed me to continuously exceed my monthly quota.

Yelp, *Franchise Account Executive* June 2018-February 2019

- Communicate national partnership information with franchisees and sell corporate approved advertising programs on Yelp by showing their backend data that revealed the amount of traffic their Yelp pages were receiving.
- Exceeded monthly quota goals, even when piloting an initiative that had us reach out to brands with no corporate partnership.

Yelp, *Account Executive* June 2017-May 2018

- Owned and managed a pipeline of local small to medium clients through Salesforce, which showed me the importance of a CRM.
- Consistently exceeded monthly sales goals-more than 200k in total booked revenue by helping business owners understand their potential share of voice with advertising.

Education:

General Assembly, Software Engineering Immersive Remote, *Student* May 2020-August 2020

Three-month, 500-hour full-time and full-stack program conducted in a remote setting, providing experience with the latest front- and back-end programming languages, tools, and methodologies. We created projects within 1-2 week sprints where we could use the languages and frameworks taught during class, as well as any new technologies that interested us.

The University of Arizona September 2013-May 2017

Major in *Communications*

Minor in Chinese, *Traditional Mandarin*
